WORK EXPERIENCE

SCIENCELOGIC | SOFTWARE ENGINEER II

Software Engineer II

Reston, VA June 2021 - Present

Apr 2025 - Present

- Built and scaled **Business Services monitoring** in SL1 AIOps SaaS platform (Node.js, Python, GraphQL, React.js), powering real-time **health, availability, and risk** views for business-critical systems.
- Improved SL1 monitoring algorithms and health calculations, contributing to [32.4% faster incident resolution](#) and [11% YoY managed-services revenue growth](#) for MSP customers.

Software Engineer I

Jun 2022 - Apr 2025

- Resolved **50+ high severity customer escalations**, debugging production microservices to restore mission-critical service visibility for **Fortune 500** enterprises and **U.S. government agencies**.

Software Engineer Intern

Jun 2021 - Aug 2022

- Hardened the Business Services platform for **FedRAMP** readiness by addressing **XSS, CSRF, and SQL injection risks**, remediating **Coverity/SonarQube** findings, and supporting **PHP 8** and **Python 3** upgrades.

OAKWIN LLC | FOUNDING ENGINEER

Remote May 2025 – January 2026

- Led a **3-engineer** team to build **MVPs** and implement custom software for existing platforms, + client contracts, **peak revenue ~\$15k/quarter**.
- **Stella Trainer:** Integrated modern UI frameworks and white-labeling into a legacy LMS system for restaurants.
- **MedLaunch:** Developed an **EHR/HCM aggregator** to track and analyze healthcare provider performance across medical practices.
- **MESA:** Delivered the MVP for a music-royalty smart-contract platform enabling automated payment splits.

DECITECH | FULL STACK DEVELOPER INTERN

McLean, VA Oct 2019 – March 2020

- Built and deployed a **CRM-driven sales dashboard** using the **MERN stack**, integrating third-party APIs and delivering real-time sales visibility on **MongoDB + Heroku**.
- Designed and maintained **client-facing web applications** with HTML5, CSS3, and JavaScript, emphasizing clean architecture, usability, and production-quality code.

SELECT PROJECTS | HACKATHON WINS

HOMEREELS

[Demo & App Store](#)

- Ran a **4-engineer team** building an **intelligent real estate discovery** and property management platform, leveraging **LangChain and Perplexity APIs** to power AI-driven property recommendations and insights.
- Built and shipped an **iOS app** using **React Native** and **TypeScript** with **Firebase** authentication and storage, integrated video playback, and deployed on the App Store.

SUGGESTI (HACK AT DAVIDSON)

[Devpost & Github](#)

- Won First Place, [Best use of Artificial Intelligence](#) at Davidson's Hack@Davidson.
- Trained an AI model to suggest alternative purchases for students depending on their current spending. Utilized **OpenAI API**, **React.js** and **Node.js**
